Re: Telephone Privacy Law, [REDACTED]

Gentlemen:

Indiana has a phone privacy law which is wonderful!

No more interrupted meals to get cold, no more mad bashes to answer the phone when outside or in the bathtub and no more long-winded calls that you cannot hang up on when not interested.

I have maintained and will continue to maintain that I pay our phone bills - and too much at that with all the added taxes and payments for low income groups, etc. - for OUR use and convenience..

When the tele-marketers pay our bill, then they will have a complaint.

Until that time, please do not mess with Indiana's no call list.

While I am at it, those running for election should be required to follow the same rules of NOT calling those of us who are registered on the no call list in Indiana.

Very truly yours, §
